

Tesla Android Box Bluetooth Audio Setup Guide

Quick Flow

1. Power on the Tesla Android Box and wait until it finishes booting.
2. Open Settings from the Box Control Center.
3. In Settings, make sure Audio Mode is set to Bluetooth.
4. Open Bluetooth on the Tesla screen, then search for and connect to TslBoxBT-xxxxx.
5. Play music or video on the Box and confirm that the sound comes from the vehicle speakers.

Before You Start

- Park the vehicle safely before setup.
- Make sure the Tesla Android Box is connected and the Box desktop or Control Center is visible.
- If several old TslBoxBT records are saved in the Tesla Bluetooth list, remove the old records before pairing again.

Detailed Steps

1. Power on the Box

Connect the Tesla Android Box to the vehicle USB-C/power port. Wait for the indicator light and boot process to finish.

Figure 1. Power on the Box

2. Open Control Center

After the Box desktop appears, open Control Center and find Settings.

Figure 2. Open Control Center

3. Set the audio mode

In Settings, make sure Audio Mode is set to Bluetooth. The other options are not related to this Bluetooth audio connection.

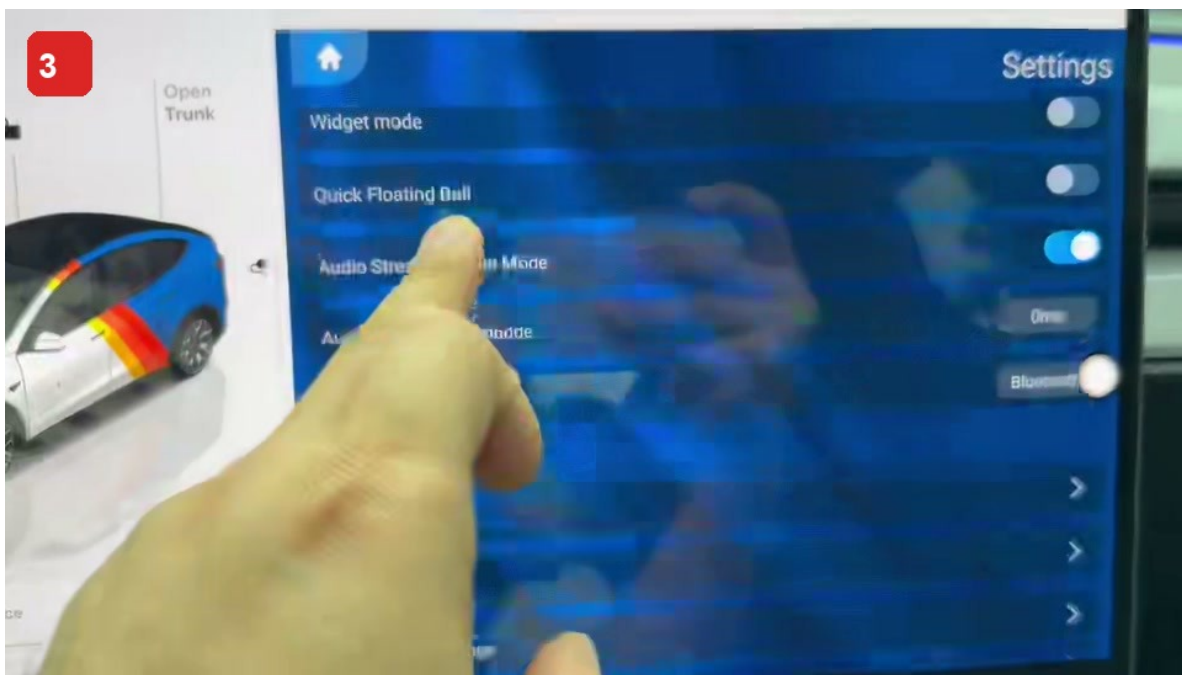

Figure 3. Set the audio mode

4. Search from the Tesla screen

Tap the Bluetooth icon at the bottom of the Tesla screen, or open Bluetooth from the vehicle settings, then search for nearby devices.

5. Connect the TslBoxBT device

Select TslBoxBT-xxxxx under Paired Devices or Nearby Devices. If a pairing prompt appears, confirm or connect.

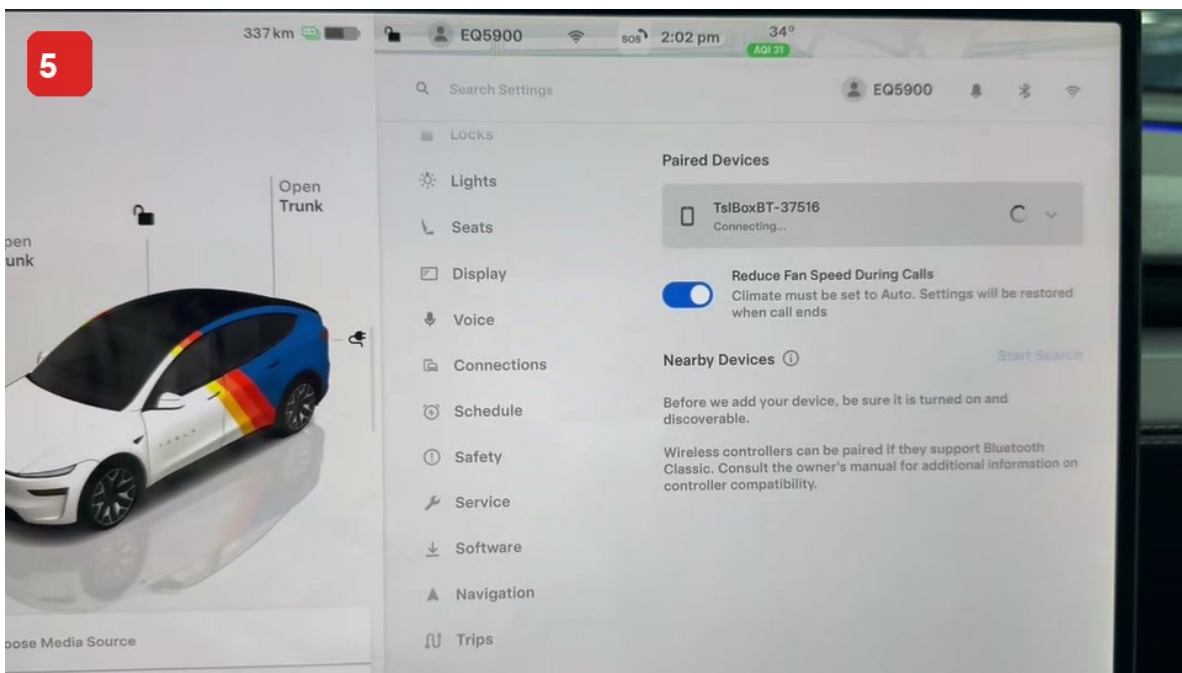

Figure 5. Connect the TslBoxBT device

6. Verify playback

Return to a music, video, or other media app on the Box. The setup is complete when sound plays through the Tesla speakers.

Final Check

- The Tesla Bluetooth page shows TslBoxBT-xxxxx as connected or connecting.
- When media is played on the Box, sound comes from the Tesla vehicle speakers.
- After the first successful pairing, the Box usually reconnects automatically. If it does not, tap TslBoxBT-xxxxx once in the Tesla Bluetooth list.

FAQ

Question	Answer
Tesla cannot find TslBoxBT-xxxxx.	Make sure the Box has booted; make sure Audio Mode in Settings is set to Bluetooth; tap Start Search on the Tesla Bluetooth page; if it still does not appear, unplug and reconnect the Box power, then try again.
The device is connected but there is no sound.	Make sure Tesla is not muted and raise the volume; make sure the Box is playing media; select Bluetooth audio as the Tesla media source; if needed, disconnect and reconnect TslBoxBT.
Will the device name always be TslBoxBT-37516?	No. The numbers may vary by device. A name beginning with TslBoxBT is the Box Bluetooth audio device.
Do I need to repeat setup every time?	Usually no. After the first pairing, it should reconnect automatically. Pair again only after changing vehicles, deleting Bluetooth records, or resetting the Box.
